New Press Fit Sensor Insert eliminates installation errors for flush mount sensors

RJG's Flush Mount Sensor Press Fit Insert contains a complete 4mm flush mount sensor pocket, with all the critical dimensions taken care of for you. This greatly simplifies the installation of RJG flush mount sensors, as well as provides an alternative installation technique for difficult applications.

Proper installation is critical to the performance of a sensor. With just a few simple steps you can successfully install a flush mounted sensor correctly every time. Simply choose your location, drill a clearance hole, bore the insert pocket, cut a channel for the cable, press fit the insert in the pocket and install the sensor.
