## **RJG Becomes Sponsor of MAPP**

On June 23, 2009 Matt Groleau, *President & CEO of RJG, Inc.* presented Tom Duffey, *President of MAPP* (Manufacturers Association for Plastics Processors) with a sponsorship check. RJG, Inc. has been a supporter of MAPP for the last two years and the organizations have now decided to increase their partnership.

RJG, Inc. is the only company that supplies you with comprehensive systems, a processing strategy, in-depth training and constant professional support. All of RJG's processing tools are built on scientific molding principles and molding from the plastic's point of view. This new partnership will offer discounted pricing to MAPP members on RJG training as well as give MAPP members the tools and resources to increase their companies' effectiveness.

MAPP is the only processor driven manufacturers association and largest grass-roots organization of its kind in the plastics industry. With members located across the United States, MAPP offers an array of services which are all designed to significantly impact plastics business operations and grow bottom line profits.

Functioning as the information hub for the plastics industry, MAPP provides industry statistics, operational benchmarks, and comprehensive studies on standard operating procedures to its manufacturing member executives so they can make better, more informed decisions.
